Revit API Expert Roundtable: Open House on the Factory Floor

Augusto Goncalves
Autodesk

Diane Christoforo
Autodesk

Keith With
Autodesk

Miroslav Schonauer
Autodesk

Learning Objectives

- Get answers to Revit programming questions that are bugging you
- Meet, and make yourself heard by, the Revit Development Team and developer support experts
- Discuss your needs, wishes, and solutions with Autodesk employees and your peers
- Gain a firsthand impression of the current hot Revit API issues

Description

Interact with a panel of Revit API experts to answer your questions and discuss all relevant topics of your choice. For anyone writing add-ins for Revit software, this is the perfect forum to better know the people who shape the APIs you work with, and explain your views, ideas, and problems face to face. Please note that prior .NET programming and Revit add-in development experience is required. This class is not suitable for beginners.

Notes from this panel

Please check The Building Coder blog for notes after the panel. For now, here is list of notes from previous years:
